EAE video

My aspiration is to either become a sports management professional, a Karate athlete, or a Karate coach. To work towards this, I decided to apply for the EAE in *Higher Nitec* in Sport Management. This has allowed me to develop useful practical skills while attaining relevant theoretical knowledge such as in the area of sports science and coaching. I believe this has placed me in good stead for a fulfilling sports career!

Though I qualified for Secondary 5, I had doubts about my O-Level prospects. Encouraged by my parents to focus on my strengths, I explored my interest in IoT and engineering and chose ITE through the Direct-Entry Scheme to Polytechnic Programme (DPP) – a decision that changed my life.

My time at ITE was instrumental - it gave me the chance to challenge perspectives, grow alongside my peers, and discover my potential. Leading and being a voice for students who often go unheard means a great deal to me. I hope my journey inspires others to take charge of their story and be the light at the end of someone's tunnel.

The image shows four individuals—two men and two women—engaged in a collaborative activity. They are positioned in front of a large informational display. The man on the far right is holding a small yellow robotic car. The background display features several key terms and diagrams: 'Hands-free Wearables' with an illustration of a person wearing a headset; 'Robots' with an illustration of a yellow forklift; 'Data' with an illustration of a network of nodes; and 'LOGISTICS SOLUTIONS' which includes a list of services: 'Supply chain planning, design and engineering to optimise transport, inventory management and service quality'. There is also a diagram of a network with a central node and a location pin, and a section titled 'Anticipatory Logistics' mentioning 'predictive algorithms' and 'network utilisation'. A semi-transparent circular graphic with a yellow play button icon is overlaid on the left side of the image.

ITE grads find doors to good jobs opening wider

Survey shows median pay more than doubled in 10 years; more grads also furthering studies

Sandra Davie
Senior Education
Correspondent

Students from the Institute of Technical Education (ITE) may have taken a longer road to success, but a new survey shows that their qualifications also open doors to good jobs and further education pathways.

The top 10 per cent of ITE graduates drew \$4,500 a month and the top 25 per cent, \$3,600 - similar to the average pay of residents here. Compared with their peers who went on to work after secondary school, ITE grads were better off - they earned \$600 more a month.

The survey also found that 64 per cent had gone on to study for a diploma or degree, up from 48 per cent in 2007.

ITE grad Vikram Ganesan completed a degree and is now a user experience manager with FWD Insurance.

ITE graduate Vikram Ganesan, 32, a user experience manager with FWD Insurance, agreed that ITE opened doors to higher education and good jobs for him. Mr. Vikram, who left ITE in 2004 after completing a course in multimedia technology, went on to Temasek Polytechnic and then to SMIT University in Australia to complete a degree in communication design. He credited ITE for moulding him into an independent and hands-on learner. "In polytechnic and then in university, I was ahead of the other students because of the industry-relevant and hands-on exposure that ITE gave me," he said. "And it opened doors for me to the next level of education."

Kish Gek said: "Clearly, an ITE education builds in one's mind the skills that enable them to access good jobs. It also provides them with a strong foundation to go on to further education at some point in their career."
