[Weighting: 50%]	N1 Numbers and Algebra N2 Ratio and Proportion N3 Percentage N4 Rate and Speed N5 Algebraic Expressions and Formulae N6 Functions and Graphs N7 Equations and Inequalities G1 Angles, triangles and polygons G2 Congruence and similarity G3 Properties of Circles G4 Pythagoras' theorem and trigonometry G5 Mensuration G6 Coordinate Geometry S1 Data handling and analysis S2 Probability
	4045	2	2 h	Section A – Answer ALL questions Contains 9 – 10 questions of varying length. The last question of 7 to 8 marks in this section focuses specifically on applying mathematics to a real-world scenario. Section B – Answer 1 out of 2 questions Questions in Section B will be based on the content below: Properties of circles: •Symmetry properties of circles: * equal chords are equidistant from the centre * the perpendicular bisector of a chord passes through the centre * tangents from an external point are equal in length * the line joining an external point to the centre of the circle bisects the angle between the tangents •Angle properties of circles: * angle in a semicircle is a right angle * angle between tangent and radius of a circle is a right angle * angle at the centre is twice the angle at the circumference * angles in the same segment are equal * angles in opposite segments are supplementary Pythagoras' theorem and trigonometry: * use of sine rule and cosine rule for any triangle * problems in two and three dimensions including those involving angles of elevation and depression and bearings Mensuration: * use of radian measure of angle (including conversion between radians and degrees) * problems involving the arc length, sector area of a circle and area of a segment Data analysis: •analysis and interpretation of: *cumulative frequency diagrams * box-and-whisker plots • quartiles and percentiles • range, interquartile range and standard deviation as measures of spread for a set of data • calculation of the standard deviation for a set of data (grouped and ungrouped) • using the mean and standard deviation to compare two sets of data And, there will be one question from Geometry & Measurement strand and one from Statistics and Probability strand. Each question carries the same number of marks, that is, either 7 or 8 marks. [Weighting: 50%]
